- Key lock

one Touch

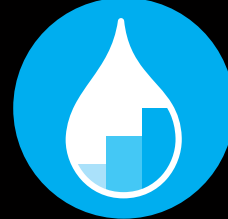

See what you can do with a simple touch

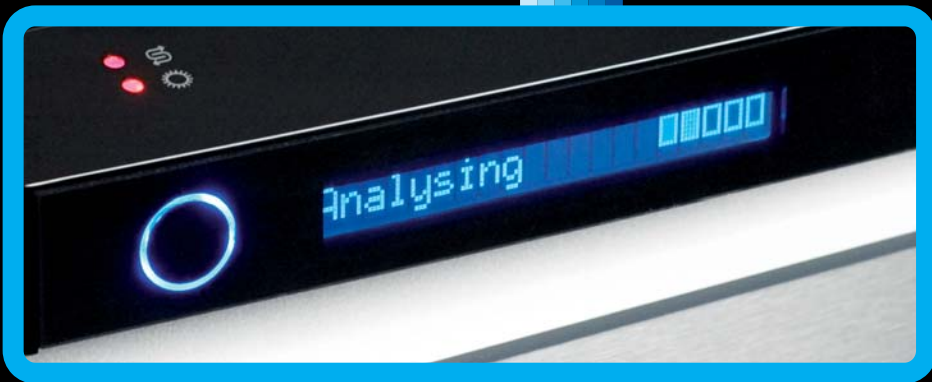

Imagine if your dishwasher could sense the dirt level and apply the most suitable programme

Imagine if it could sense the amount of dishes in the machine and decide how much water to use

Imagine if it could determine the water hardness and adjust it for an effective and gentle wash

Imagine one discreet LCD display that shows programme steps (washing, drying, rinsing), time remaining, warning messages and amount of water and energy consumed

Imagine a dishwasher offering best results with minimum energy (AAA rated) that's so quiet, at just 42dBA, you will hardly notice it's there

Imagine extra features like key lock function, protection against water leakage and mix wash technology

Imagine if this all happened at the touch of a button

Enjoy perfect dishwashing with **OneTouch** by Beko
